

## The String Game

Event: Various  
Theme: N/A  
Preparation Time: 15-20 minutes  
Running Time: 20-30 minutes  
Materials: Tent Peg  
Lots of String

Preparation: The string needs to be cut into multiple pieces, which can either be all the same size, or can be varying in length. The pieces of string are then distributed amongst a group of volunteers who will roam the playing area. A tent peg needs to be placed in the ground for each team, and the pegs all need to be in a line.

Playing The Game: The teams need to make the longest chain of string pieces possible to win. To do this they need to go out and collect a piece of string from the wanderers with the string. They then return to their tent peg and tie on each piece of string to the previous. Each member of the team can only hold one piece of string at any given time.

Notes: The game can be made harder by insisting on Reef Knots being tied rather than any other knots.
